

Student Volunteer Acts Quickly for a Veteran

*1 Robert McLarty, dental lab director, BeBe Odeh, the youth volunteer
and Sadie Stewart, assistant chief voluntary services*

On July 6, 2010, BeBe Odeh, a youth volunteer (his mother Esther works at VA West LA) noticed a veteran slumped over, and asked him if he needed help. As it turns out, his oxygen tank had run out and he was having trouble breathing.

BeBe told him to hang on, and RAN back to his supervisor to get help. Dr. Josephs (the attending on duty at the dental clinic) was able to take a quick medical history, got him oxygen, and when he recovered, he got him in a wheelchair back to his car (where his extra oxygen tank was ready.)

Thanks to Odeh for helping our veterans!
